

# HA 抗原

中文名称: HA 抗原

英文名称: HA Antigen

别名: HA epitope tag, Hemagglutinin Tag

相关类别: 抗原

储存: 冷冻 (-20℃)

## 概述

Synthetic peptide: YPYDVPDYAC

## 技术规格

|                    |  |
|--------------------|--|
| <b>Full name:</b>  | Human influenza hemagglutinin Tag  |
| <b>Synonyms:</b>   | HA epitope tag, Hemagglutinin Tag  |
| <b>Background:</b> | Human influenza hemagglutinin (HA) is a surface glycoprotein required for the infectivity of the human virus. The HA tag is derived from the HA-molecule corresponding to amino acids 98-106 has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. This tag facilitates the detection, isolation, and purification of the proteins. |
