

## HINT2 抗原(重组蛋白)

中文名称: HINT2 抗原(重组蛋白)

英文名称: HINT2 Antigen (Recombinant Protein)

储 存: 冷冻 (-20℃)

相关类别: 抗原

概述

Fusion protein corresponding to a region derived from 18-163 amino acids of human HINT2

## 技术规格

Full name:	histidine triad nucleotide binding protein 2
Synonyms:	HIT-17
Swissprot:	Q9BX68
Gene Accession:	BC047737
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Hint2 (histidine triad nucleotide binding protein 2), also known as HI T-17, is a 163 amino acid secreted protein that contains one HIT do main, a histidine triad that has catalytic activity toward the ?-phosph ate of ribonucleotides. Via its HIT domain, Hint2 is thought to functi on as a hydrolase that is encoded by a gene which maps to chromo some 9. Chromosome 9 contains 145 million base pairs and comprise s 4% of the human genome, encoding nearly 900 genes. Hereditary hemorrhagic telangiectasia and Familial dysautonomia are both associ ated with chromosome 9. Notably, chromosome 9 encompasses the I argest interferon family gene cluster.
