技术规格

Background:	This locus represents naturally occurring read-through transcription between the neighboring MUTED (muted homolog) and TXNDC5 (thioredoxin domain containing 5) genes on chromosome 6. The read-through transcript is a candidate for nonsense-mediated mRNA decay (NMD) and is unlikely to produce a protein product.
Applications:	ELISA, WB, IHC
Name of antibody:	TXNDC5
Immunogen:	Full length fusion protein
Full name:	BLOC1S5-TXNDC5 readthrough (NMD candidate)
Synonyms :	MUTED-TXNDC5
SwissProt:	Q86UY0
ELISA Recommended dilution:	2000-10000
IHC positive control:	Human breast cancer and Human liver cancer

IHC Recommend dilution:	30-150
WB Predicted band size:	48 kDa
WB Positive control:	293T, hela and hepg2 cell, human placenta and fetal muscle tissue, PC3 and HT-29 cell
WB Recommended dilution:	1000-5000
